Summary

Data Engineer with over 3 years of experience building reliable data pipelines, modeling enterprise data, and tuning SQL performance. Experienced in migrating legacy data warehouses to modern cloud platforms and optimizing code to speed up business reporting.

Experience

Data Engineer

Jan 2023 – Present

Deloitte USI

Hyderabad, India

- Designed and implemented enterprise-grade data integration solutions using Oracle FDI, integrating data from **10+** business sources into unified analytical models.
- Created **20+** dashboards and configured multiple Subject Areas in Oracle FDI by leveraging semantic modeling and RPD to unify business definitions across the organization.
- Improved reporting latency by **83%** by changing scheduled data refresh frequency from daily to 4-hour intervals, delivering near-real-time data to teams.
- Identified and resolved **60+** data issues during BAT and **20+** critical production incidents, improving data accuracy and ensuring uninterrupted reporting across enterprise dashboards.
- Led migration of large-scale data warehouse workloads containing millions of records to Azure Synapse Analytics, improving overall query performance by **70%** through optimized data modeling and architecture changes.
- Automated **10+** data ingestion and transformation pipelines using Azure Data Factory to handle reliable data movement across multiple source systems.
- Analyzed and resolved performance bottlenecks in SQL views by optimizing query logic, joins, and execution plans, resulting in a **50%** reduction in query execution time.

Skills

Programming

SQL, Python, PySpark, C++, C, JavaScript

BI & Visualization

Oracle FDI, Power BI

Cloud & Data Warehousing

Microsoft Azure, Azure Data Factory (ADF), Azure Synapse Analytics, Azure Databricks, Snowflake, AWS(S3)

Orchestration

Control-M

Projects

End-to-End E-Commerce Analytics Platform — Olist Dataset

[GitHub](#)

- Designed and implemented a scalable star schema data warehouse in Snowflake processing 100K+ ecommerce order records.
- Developed 20+ modular dbt models using layered architecture for reusable and maintainable data transformations.
- Built interactive Power BI dashboards with 15+ advanced DAX measures for customer, product, sales, and delivery analytics.
- **Tools Used:** Snowflake, Data Build Tool (dbt), SQL, PowerBI, DAX, AWS(S3)

Certifications & Awards

- | | |
|--|-----------|
| • Databricks Data Engineer Associate | Jun 2025 |
| • Power BI Data Analyst Associate (PL-300) | July 2024 |
| • Azure Data Engineer Associate (DP-203) | Aug 2023 |

Education

B.E in Computer Science

2018 - 2022

The National Institute of Engineering, Mysuru

CGPA: 9.16 / 10
